Sydney Metro West

Notification – out of hours work – Westmead

3 November 2026

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, transforming Sydney for generations to come. Sydney Metro West will target an opening date of 2032.

Sydney Metro has engaged John Holland to deliver the Linewide package. Delivering 60kms of track across the network, installation of rail systems and construction of Sydney Metro West's 38-hectare stabling and maintenance facility in Clyde.

What work are we doing?

Linewide will be undertaking out-of-hours construction activities from 10 November until the end of January 2027, weather dependant. Work will include delivery, stockpiling and removal of materials, plant, equipment and machinery, concrete pours and associated concrete works. These activities are required to directly support ongoing tunnel fit-out activities. Trucks will enter via Hassall Street and exit via Hawkesbury Road.

Where possible, work will be carried out during standard construction hours between **7am to 6pm**, **Monday to Friday** and **8am to 6pm** on **Saturdays**, however some activities may occur outside of standard construction up to **10pm** when concrete pours are scheduled. Out-of-hours work is not expected to occur regularly and is included as a contingency only.

What will this mean for you?

These activities are expected to have a low-moderate noise impact.

- Noise from machinery and equipment
- Truck and construction vehicle movements via Park Parade, Alexandra Avenue, Hassall Street and Hawkesbury Road
- Presence of dust, water and lighting within site.
- Trucks and equipment exiting site will undergo cleaning within a designated containment area.

Managing our impacts on the community

Any work undertaken outside of standard construction hours will take place in line with project planning approvals. We aim to manage our out of hours work to minimise disruption to the community and the environment. This includes:

- Plan noisy activities that are close to residents during standard construction hours or early evening, where possible
- Applying appropriate respite during noisy activities
- Avoiding consecutive nights of work where possible
- Monitoring noise and vibration levels
- Turn off vehicles when not in use
- Direct lighting towards work areas and away from neighbouring properties
- Using onsite dust suppression
- There will be no work on Sundays or public holidays.
