

Notification – Eastern Creek

31 May 2021

Sydney Metro is Australia's biggest public transport project.

Sydney Metro West will connect Greater Parramatta with the Sydney CBD and involve the construction of around 24 kilometres of twin tunnels. Confirmed stations include Westmead, Parramatta, Sydney Olympic Park, North Strathfield, Burwood North, Five Dock, The Bays, Pyrmont and Sydney CBD. This infrastructure investment will double the rail capacity of the Greater Parramatta to Sydney CBD corridor with a travel time target between the two centres of about 20 minutes.

Construction update: Precast Facilities

Sydney Metro will construct two adjacent precast facilities on an approximately 17 hectare site at Lenore Drive, Eastern Creek to support the delivery of Sydney Metro West. The site will be used to manufacture concrete segments needed to line the twin tunnels for Sydney Metro West. This proposal was exhibited for public comment in late 2020 and was approved on 16 February 2021.

Early works are continuing to prepare the site, including construction of temporary access road off the Lenore Drive and proposed Archbold Road intersection during standard construction hours, **Monday to Friday 7am to 6pm.**

Our Saturday hours have extended to 8am to 6pm. Please see map overleaf for the work areas.

Out-of-hours:

Due to traffic volumes on Lenore Drive, there may be work completed out-of-hours Sunday to Friday, 8pm until 5am (weather and site conditions permitting). The community will be notified separately of out of hours work when required.

Work will involve:

- Establishing temporary site compound with site fencing and site sheds
- Temporary traffic management at Lenore Drive/ Archbold Road intersection, including installation of road signage and traffic barriers
- Transportation of spoil from the Sydney International Speedway site, located on Ferrers Road in Eastern Creek, to the precast site
- Earthworks (including construction of storm water basins)
- Sampling of soil within the precast site and removal of contaminated soil and asbestos by accredited specialists
- Removal of trees and scrub
- Establishment of environmental controls (including erosion and sediment controls)
- Survey work including utility, geotechnical and topographic
- Utility investigation, adjustment and protection at the intersection on Lenore Drive (including potholing)
- Utility connections to the precast site which will include gas, potable water, electricity (including installation of a substation) and telecommunications.

What to expect:

- While carrying out these works aboriginal and non-aboriginal heritage will be considered
- Access to Lenore Drive and surrounding properties will be maintained at all times

- The work will generate noise and the team will minimise impacts where possible
- Traffic control, installation of safety barriers and directional signage will be in place for the safety of workers and the community
- There will be no disruption to the delivery of utility services.

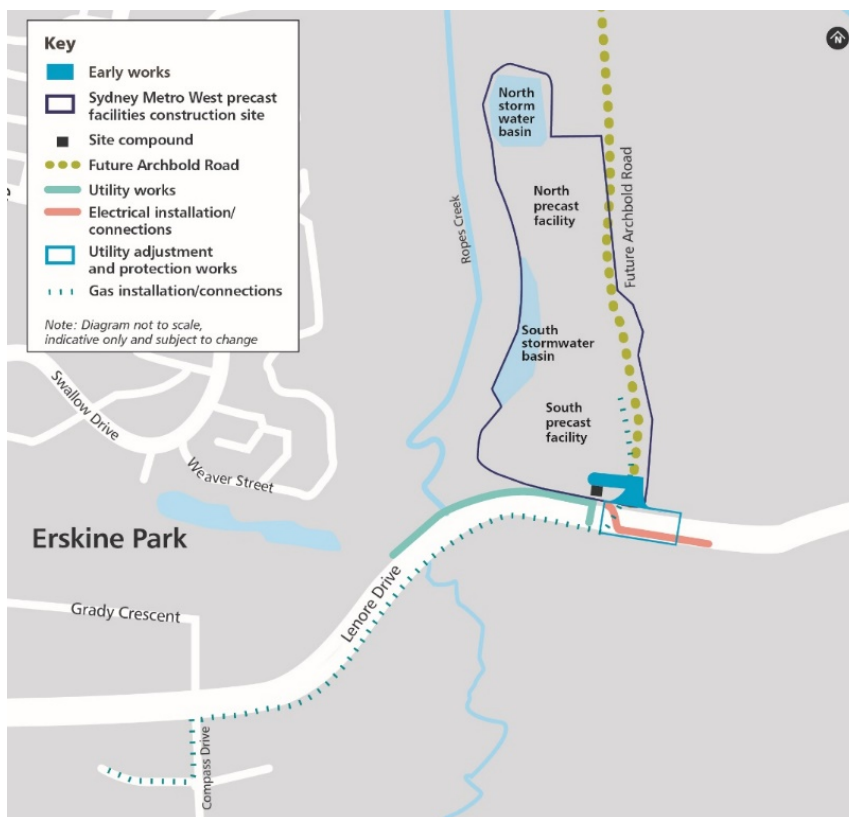

Equipment used:

Equipment used for this work includes but is not limited to: excavators, dozers, scrapers, graders, compactors, dump trucks, road trucks, cranes, water carts, street sweepers, jack hammers, saw cutters, traffic control, temporary fencing, heavy and light vehicles and generators.

Changes to traffic pedestrian and cyclist routes:

During the work, traffic control will be in place to assist motorists, pedestrians and cyclists with any changes to traffic conditions. This may include temporary and permanent traffic signage, installation of safety barriers, reduction in the speed limit, lane closures and traffic controllers present on the road. The times of these changes will vary and are dependent on road authority approvals.

Work area

Contact us:

Your local Place Manager for Sydney Metro West Precast facilities' at Eastern Creek at Eastern Creek is Anu Malaviya. Anu will be your main contact for questions and enquiries regarding the project and can be contacted on 1800 612 173.

If you would prefer to receive updates by email, please contact Anu who can add you to the distribution list. Thank you for your cooperation while we complete these essential works.
