

# Station Design and Precinct Plan – Marrickville Station

2020

An artist's impression of Marrickville Station.

## Sydney Metro is Australia's biggest public transport project

Connecting to the new Metro North West Line from Tallawong Station at Rouse Hill to Chatswood, metro rail will be extended into the Sydney CBD and beyond to Bankstown in 2024. There will be new CBD metro railway stations underground at Martin Place, Pitt Street and Barangaroo and new metro platforms under Central.

Construction is already underway to upgrade and convert the 125-year-old T3 Bankstown Line to Sydney Metro standards between Sydenham and Bankstown. Community feedback has helped shape the upgrade to minimise disruptions and reduce traffic, heritage and vegetation impacts.

In 2024, customers will benefit from a new fully air-conditioned Sydney Metro train every four minutes in the peak in each direction with lifts, level platforms and platform screen doors for safety, accessibility and increased security.

A draft Station Design and Precinct Plan has also been prepared for Marrickville Station that shows how the design has developed.

## What is a Station Design and Precinct Plan (SDPP)?

The draft SDPP outlines the urban, landscaping and architectural design for Marrickville Station and shows how it will integrate with the surrounding precinct. It identifies the design objectives and principles, and discusses opportunities to improve public spaces, connectivity, transport and access.

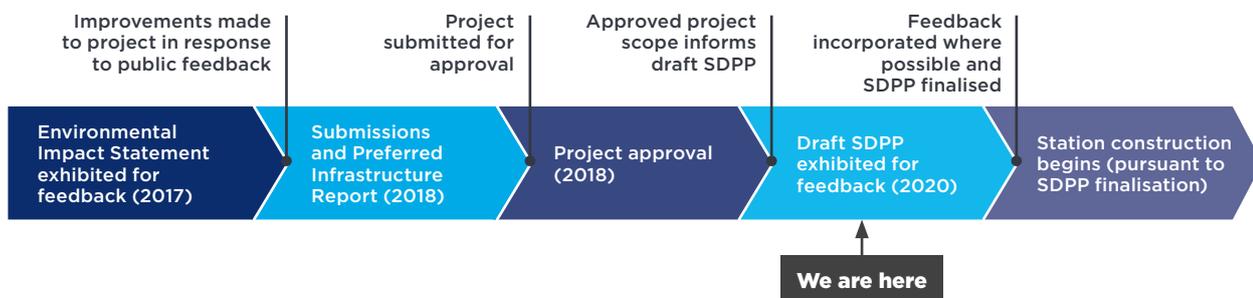

### Design objectives

- Support Sydney Metro services
- Provide an easy customer experience
- Provide a fully accessible and integrated transport system design
- Responsive to the distinct local character.

### Key improvements

- Widening and repaving of the existing pedestrian path from Station Street to Myrtle Street to create a new shared walking and cycling path
- New lighting, signage and tree planting along the shared path to create a safe walking and cycling environment
- Installation of platform screen doors for increased safety
- Installation of mechanical gap fillers to remove the gap between train and platform
- Refurbishment of station building rooms on Platforms 1 and 2
- Upgrades to current wayfinding.

## SDPP development

## Have your say

You are encouraged to provide feedback on the Marrickville draft SDPP between: **Monday 29 June and Friday 24 July 2020.**

The draft SDPP is available online at **[sydneymetro.info/station/Marrickville-station](http://sydneymetro.info/station/Marrickville-station)**.

Please submit your feedback via e-mail to **[southwestmetro@transport.nsw.gov.au](mailto:southwestmetro@transport.nsw.gov.au)** by **5pm on Friday 24 July 2020.**

## Next steps

Your feedback will be considered and addressed in the final Marrickville SDPP, which will be made available on the Sydney Metro website.

Properties close to the rail corridor will receive notifications when work is scheduled to occur and we will continue to keep the general community updated through our website **[sydneymetro.info](http://sydneymetro.info)**, social media channels and e-mail updates.
